NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Talcott Resolution Life Insurance Company (the "Company" or "TL") have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department ("the Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed practices by the State of Connecticut.

A difference prescribed by Connecticut state law allows the Company and its wholly-owned subsidiary, Talcott Resolution Life and Annuity Insurance Company ("TLA"), to receive a reinsurance reserve credit for reinsurance treaties that provide for a limited right of unilateral cancellation by the reinsurer. Even if the Company and/or TLA did not obtain reinsurance reserve credit for these reinsurance treaties, the Company's and TLA's risk-based capital would not have triggered a regulatory event.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed by the Department is shown below:

The Company's reported investment in TLA was \$643,913,473 and \$626,632,214 as of June 30, 2025 and December 31, 2024, respectively. The Company's investment in TLA would have been reported as \$618,842,959 and \$605,674,838 as of June 30, 2025 and December 31, 2024, respectively, without the state prescribed practices.

The Company does not follow any other prescribed or permitted statutory accounting practices that have a material effect on statutory surplus, statutory net income or risk-based capital of the Company.

C. Accounting Policy

2. The Company had no SVO - identified investments in exchange traded funds or bond mutual funds that qualifies for bond accounting treatment.
6. Asset-backed securities, excluding residual tranches or interests, are carried at amortized cost, except those rated in NAIC class 6, which are carried at the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43 - Asset-Backed Securities ("SSAP No. 43"). Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method, except for highly rated securities, which use the retrospective method  
  
Debt investments that do not meet the requirements of an issuer credit obligation in SSAP No. 26 - Bonds ("SSAP No. 26") or an asset-backed security in SSAP No. 43 are carried at the lower of amortized cost or fair value in accordance with SSAP No. 21- Other Admitted Assets ("SSAP No. 21"). In accordance with guidance in SSAP No. 21 - amortized cost for such debt investments is determined in a manner consistent with asset-backed securities within the scope of SSAP No. 43.
16. Investments in surplus debentures and capital notes rated in NAIC class 1 or 2 are carried at amortized cost. Those that are rated in NAIC classes 3 through 6 are carried at the lower of amortized cost or fair value.
17. Residual tranches or interests are carried under the practical expedient method (i.e., cost recovery method) pursuant to SSAP No. 21. In accordance with such guidance, the positions are initially reported at cost, and all subsequent distributions reduce the book adjusted carrying value. The Company does not recognize income until after the investment value reaches zero.

D. Going Concern

The Company is not aware of any conditions or events which raise substantial doubts concerning the Company's ability to continue as a going concern.

Note 2 - Accounting Changes and Corrections of Errors

Accounting Changes

In 2023, the NAIC adopted revisions to several statutory statements to finalize guidance throughout applicable standards related to the updated definition of a bond. The changes incorporated a principles-based definition which categorizes bonds as either issuer credit obligations (under SSAP No. 26 to be reported on Schedule D-1-1) or asset-backed securities (under SSAP No. 43 to be reported on Schedule D-1-2). The Company adopted the revised standards effective January 1, 2025 and reclassified investments in accordance with the new principles-based definition. Approximately \$168 million of investments previously reported on Schedule D Part 1 were reclassified to Schedule BA. Of these investments, approximately \$119 million of book adjusted carrying value went from an amortized cost measurement to a fair value measurement, which resulted in an approximate a \$10 million unrealized loss to surplus.

In 2025, the NAIC adopted revisions to SSAP No. 56 – Separate Accounts to clarify guidance for how to transfer any separate account assets carried at book value between the separate and general accounts. The Company elected early adoption of this guidance in 2025, however, it is not material to the Company.

In 2025, the NAIC adopted revisions to SSAP No. 41 – Surplus Notes to clarify that capital notes should be nonadmitted in the event in which the regulatory authority halts principal or interest payments. The Company adopted this guidance in 2025, however, it is not material to the Company.

In 2024, the NAIC modified SSAP No. 21 to prescribe a measurement framework for all residual interests regardless of legal form. The updates allow for a policy election of the Allowable Earned Yield Method or Practical Expedient Method (i.e., cost recovery method). The Company adopted the revised standards effective January 1, 2025 and elected the Practical Expedient Method. However, the updates are not material to the Company.

NOTES TO FINANCIAL STATEMENTS

In 2024, the NAIC modified SSAP No. 94 – Low Income Housing Tax Credit Property Investments to clarify in-scope tax credit investments. The Company adopted this guidance in 2025, however, it is not material to the Company.

In 2024, the NAIC modified SSAP No. 15 – Debt and Holding Company Obligations to require additional disclosures related to unused commitments and lines of credit, disaggregated by short and long-term commitments. The Company adopted this guidance in 2024, however, it is not material to the Company.

In 2024, the NAIC modified SSAP No. 86 – Derivatives to require additional disclosures identifying where cash flows associated with derivative transactions are presented in the Statement of Cash Flow. The Company adopted this guidance in 2024, however, it is not material to the Company.

Recently Issued Accounting Standards

In 2025, the NAIC adopted updates to SSAP No. 1 – Accounting Policies, Risks & Uncertainties, and Other Disclosures to require the reporting of assets held under modified coinsurance ("Modco") or funds withheld ("FWH") agreements within the restricted asset disclosure. The NAIC also adopted updates to SSAP No. 1 that require disclosure of investments held in FWH or Modco portfolios that are affiliated assets of the reinsurer. The Company will adopt the revised standards effective December 31, 2025.

Note 3 - Business Combinations and Goodwill

No significant change.

Note 4 - Discontinued Operations

No significant change.

Note 5 - Investments

D. Asset-Backed Securities

- 1. Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey values or internal estimates.
- 2. The Company had no other-than-temporary impairments ("OTTI") for asset-backed securities recorded during the year where the Company had either the intent to sell the securities or the inability or lack of intent to retain.
- 3. The Company did not recognize any OTTI for loan-backed securities held as of June 30, 2025.

4. Security Unrealized Loss Aging

All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

|                        |               |
|------------------------|---------------|
| 1. Less than 12 Months | \$ 11,848,890 |
| 2. 12 Months or Longer | \$ 61,077,968 |

b. The aggregate related fair value of securities with unrealized losses:

|                        |                |
|------------------------|----------------|
| 1. Less than 12 Months | \$ 409,214,960 |
| 2. 12 Months or Longer | \$ 730,327,638 |

- 5. As of June 30, 2025, asset-backed securities in an unrealized loss position comprised 401 securities, primarily related to commercial mortgage-backed securities ("CMBS"), residential mortgage-backed securities ("RMBS"), and collateralized loan obligations ("CLO"), which were depressed primarily due to higher interest rates and/or widening of credit spreads since the securities were purchased. The Company does not intend to sell the securities outlined above. Furthermore, based upon the Company's cash flow modeling and the expected continuation of contractually required principal and interest payments, the Company has deemed these securities to be temporarily impaired as of June 30, 2025.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

- 3. Collateral Received

b. The Company did not accept collateral that is permitted by contract or custom to sell or repledge as of as of June 30, 2025.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

- 1. Company Policies or Strategies for Repo Programs

From time to time, the Company enters into repurchase agreements to manage liquidity or to earn incremental income. A repurchase agreement is a transaction in which one party (transferor) agrees to sell securities to another party (transferee) in return for cash (or securities), with a simultaneous agreement to repurchase the same securities at a specified price at a later date. These transactions generally have a contractual maturity of ninety days or less. Repurchase agreements include master netting provisions that provide both counterparties the right to offset claims and apply securities held by them with respect to their obligations in the event of a default. Although the Company has the contractual right to offset claims, the Company's current positions do not meet the specific conditions for net presentation.

Under repurchase agreements, the Company transfers collateral of U.S. government, government agency and corporate securities and receives cash. For repurchase agreements, the Company obtains cash in an amount equal to at least 95% of the fair value of the securities transferred. The agreements require additional collateral to be transferred when necessary and provide the counterparty the right to sell or re-pledge the securities transferred. The cash received from the repurchase program is typically invested in short-term investments or fixed maturities and is reported as an asset on the Company's consolidated balance sheets. The Company accounts for the repurchase agreements as collateralized borrowings. The securities transferred under repurchase agreements are included in bonds, with the obligation to repurchase those securities recorded in Other liabilities on the Company's consolidated balance sheets.

From time to time, the Company enters into reverse repurchase agreements where the Company purchases securities and simultaneously agrees to resell the same or substantially the same securities. The agreements require additional collateral to be transferred to the Company when necessary and the Company has the right to sell or re-pledge the securities received as collateral. The Company accounts for reverse repurchase agreements as collateralized financing.

B. Derivatives under SSAP No. 108 - Derivative Hedging Variable Annuity Guarantees

(1) Discussion of Hedged Item/Hedging Instruments and Hedging Strategy

0001 Interest Rate Hedge

Present Value of Future Cash Flows of Certain Variable Annuity Contracts:

The hedged item consists of a portion of the Company's variable annuity block of business, including related minimum benefit guarantees, that is sensitive to interest rate movement. The hedged portion of the block is reviewed on a monthly basis and the hedge effectiveness is measured quarterly based on the ratio of the percentage change in asset interest rate risk (rho) compared to the percentage change in the liability interest rate risk (rho). The related hedging instrument is a portfolio of interest rate derivatives which follows a semi-static hedging strategy. Changes in interest rates impact the present value of the future product cash flows.

The Company will recognize a deferred asset within Other assets or a deferred liability within Other liabilities on the Statements of Admitted Assets, Liabilities and Capital and Surplus, for fluctuations in fair value that do not offset the changes in the liability. The deferred asset or liability will then be amortized over the timeframe required under SSAP No. 108, which is the Macaulay duration of guarantee benefit cash flows, or approximately 8 years.

The hedging strategy is compliant with VM-21 and meets all the criteria to be defined as a clearly defined hedging strategy as required by SSAP No. 108. In 2022, the Company revised its hedging position twice to reflect reinsurance transactions that the Company entered into. Hedge effectiveness is measured in accordance with SSAP No. 108 on a quarterly basis, both prospectively and retrospectively, and remains highly effective as of June 30, 2025.

On December 5, 2024, TL loaned \$150 million to TR Re per the intercompany liquidity agreement. The interest rate of this loan was 4.30% and the maturity date was December 4, 2025. On March 31, 2025, this loan was repaid plus accrued interest.

On July 3, 2024, TLA loaned \$300 million to TL per the 2018 intercompany liquidity agreement. The interest rate of this loan was 5.06% and the maturity date was July 2, 2025. On March 31, 2025, this loan was repaid plus accrued interest.

F. Effective March 31, 2025, TL entered into an agreement among several subsidiaries of Talcott Financial Group, Ltd. to optimize the use of cash by facilitating the lending and borrowing of funds between the Company and its affiliates (the "Cash Management Agreement"). The aggregate individual and combined (with TLA) lending and borrowing amount permitted under the agreement for the Company is \$1 billion.

Effective September 21, 2022, TL entered into an intercompany liquidity agreement between several Talcott entities: including TR Re, Talcott Life Re, Ltd ("TLR") and Talcott Life & Annuity Re, Ltd. ("TLAR"). TL may lend a total of \$500 million in aggregate to the affiliates. TL may also borrow a total of \$1.5 billion consisting of \$500 million from each of the aforementioned entities. Under the agreement, TLR, TLAR and TR Re cannot extend loans between one another. This agreement was terminated effective March 31, 2025.

Effective September 21, 2022, TLA entered into an intercompany liquidity agreement between several Talcott entities: including TR Re, TLR and TLAR. TLA may lend a total of \$200 million in aggregate to the affiliates. TLA may also borrow a total of \$600 million consisting of \$200 million from each of the aforementioned entities. Under the agreement, TLR, TLAR and TR Re cannot extend loans between one another. This agreement was terminated effective March 31, 2025.

B. FHLB (Federal Home Loan Bank) Agreements

1. The Company is a member of the Federal Home Loan Bank of Boston ("FHLB"). Membership allows the Company access to collateralized advances, which may be used to support various spread-based businesses or to enhance liquidity management. FHLB membership requires the Company to own member stock and borrowings require the purchase of activity-based stock in an amount (generally between 3% and 4% of the principal balance) based upon the term of the outstanding advances. FHLB stock held by the Company is classified within Page 2, Line 2.2 (Common stocks) in the General Account and carried at par. As of June 30, 2025 there were no advances outstanding.

NOTES TO FINANCIAL STATEMENTS

State law limits the Company's ability to pledge, hypothecate or otherwise encumber its assets. The amount of advances that can be taken by the Company are dependent on the assets pledged by the Company to secure the advances, and are therefore subject to this legal limit. The pledge limit is recalculated annually based on statutory admitted assets and capital and surplus. For 2025 , the Company's pledge limit is \$432 million. The Company would need to seek prior written approval from the Department in order to exceed this limit. If the Company were to pursue borrowing additional amounts under its estimated capacity it may have to purchase additional shares of activity stock.

On August 15, 2023, Talcott Resolution Life Insurance Company and Talcott Resolution Life and Annuity Insurance Company (collectively “Talcott Resolution”) were named as defendants in a putative class action lawsuit in the United States District Court for the District of Massachusetts. The case is captioned as follows: Casey v. Talcott Resolution Life Insurance Company and Talcott Resolution Life and Annuity Insurance Company, et al. The lawsuit relates to data security events involving the MOVEit file transfer system (“MOVEit Cybersecurity Incident”). The MOVEit file transfer system is software used by a broad range of companies to move sensitive electronic data. PBI Research Services (“PBI”), a former third-party service provider for Talcott Resolution, used the MOVEit file transfer system in the performance of its services. PBI used the software on behalf of Talcott Resolution to, among other things, search various databases to identify the deaths of insured persons and annuitants under life insurance policies and annuity contracts, respectively, as required by applicable law. Plaintiff seeks to represent various classes and subclasses of Talcott Resolution insurance policy and annuity contract holders whose data allegedly was accessed or potentially accessed in connection with the MOVEit Cybersecurity Incident.

Plaintiff alleges that Talcott Resolution breached a purported duty to safeguard their sensitive data from unauthorized access. The complaint asserts claims for, among other things, negligence, negligence per se, breach of contract, unjust enrichment, and violations of various consumer protection statutes, and the Plaintiffs seek declaratory and injunctive relief, compensatory and punitive damages, restitution, attorneys’ fees and costs, and other relief. On October 4, 2023, the Judicial Panel on Multidistrict Litigation issued an order consolidating all actions relating to the MOVEit Cybersecurity Incident before a single federal judge in the United States District Court for the District of Massachusetts. We intend to vigorously defend the action.

The Company is or may become involved in various legal actions, some of which assert claims for substantial amounts. Such actions have alleged, for example, bad faith in the handling of insurance claims and improper sales practices in connection with the sale of insurance and investment products. Some of these actions also seek punitive damages. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the financial condition of the Company. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial condition, results of operations or cash flows in particular quarterly or annual periods.

For additional information, please refer to the current and periodic reports filed by the Company with the United States Securities and Exchange Commission.

Note 20 - Fair Value Measurements

A. Fair Value Measurements

Fair value is determined based on the "exit price" notion which is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. Financial instruments carried at fair value in the Company's financial statements include certain bonds, stocks, derivatives, and Separate Account assets.

The Company utilizes the services of third-party investment managers, including Hartford Investment Management Company ("HIMCO"), Pacific Investment Management Company, LLC ("PIMCO"), and Sixth Street Insurance Solutions, L.P., that are registered investment advisers under the Investment Advisers Act of 1940. The Company's Investment Valuation Committee ("IVC"), a working group chaired by the Chief Financial Officer ("CFO") of the Talcott Financial Group Investments, LLC subsidiaries, oversees the investment activities of these investment managers and directs other investments to maximize economic value and generate the returns necessary to support the Company's various product obligations, within internally established objectives, guidelines and risk tolerances. The portfolio objectives and guidelines are developed, by the Company, based upon the asset/liability profile, including duration, convexity and other characteristics within specified risk tolerances. The risk tolerances considered include, but are not limited to, asset sector, credit issuer allocation limits, and maximum portfolio limits for below investment grade holdings. The Company attempts to minimize adverse impacts to the investment portfolio and the Company's results of operations from changes in economic conditions through asset diversification, asset allocation limits, and asset/liability duration matching and the use of derivatives. The following section applies the fair value hierarchy and disclosure requirements for the Company's Separate Account assets, and categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2, or 3):

- Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date.
- Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or liability, or prices for similar assets and liabilities.
- Level 3 Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of amounts that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company's investment manager will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g. changes in risk assumptions) inputs are used in determination of fair values that the Company's investment manager has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's bonds included in Level 3 are classified as such because these securities are primarily within illiquid markets and/or priced by independent brokers.

- 1. The following table presents assets and (liabilities) carried at fair value by hierarchy level:

Valuation Techniques, Procedures and Controls

The Company determines the fair values of certain financial assets and liabilities based on quoted market prices where available and where prices represent reasonable estimates of fair value. The Company also determines fair values based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments listed in the preceding tables.

The fair value process is monitored by the respective Valuation Committees of the Company's investment managers, which are comprised of senior management that meets at least quarterly. The purpose of the committee is to oversee the pricing policy and procedures by ensuring objective and reliable valuation practices and pricing of financial instruments as well as addressing valuation issues and approving changes to valuation methodologies and pricing sources.

NOTES TO FINANCIAL STATEMENTS

In addition, the IVC is responsible for the approval and monitoring of the Valuation Policy of the Company as well as the adjudication of any valuation disputes thereunder. The Valuation Policy addresses valuation of all financial instruments held in the general account and guaranteed separate accounts of the Company, including all derivative positions. The IVC meets regularly, and its members include a cross-functional group of senior management as well as various investment, accounting, finance, and risk management professionals.

The Company also has an enterprise-wide Operational Risk Management function with Enterprise Risk Management (“ERM”) which is responsible for establishing, maintaining and communicating the framework, principles and guidelines of the Company’s operational risk management program. The Enterprise Model Oversight Working Group ensures compliance with the ERM framework by providing an independent review of the suitability, characteristics and reliability of model inputs as well as an analysis of significant changes to current models.

Bonds and Stocks

The fair values of bonds and stocks in an active and orderly market (e.g., not distressed or forced liquidation) are determined by the Company’s investment managers using a “waterfall” approach utilizing the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal matrix pricing processes. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities’ relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

Prices from third-party pricing services may be unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

The Company’s investment managers utilize an internally developed matrix pricing process for private placement securities for which the Company is unable to obtain a price from a third-party pricing service. The process is similar to the third-party pricing services. The Company’s investment managers develop credit spreads each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The credit spreads determined through this survey approach are based upon the issuer’s financial strength and term to maturity, utilizing independent public security index and trade information and adjusting for the non-public nature of the securities. Credit spreads combined with risk-free rates are applied to contractual cash flows to develop a price.

The Company’s investment managers perform ongoing analyses of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. In addition, the Company’s investment managers ensure that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models utilizing spreads, and when available, market indices. As a result of these analyses, if the Company’s investment managers determine that there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly and approved by the Valuation Committee of the Company’s investment managers.

The Company’s investment managers conduct other specific monitoring controls around pricing. Daily, weekly and monthly analyses identify price changes over pre-determined thresholds for bonds and equity securities. Monthly analyses identify prices that have not changed, and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differs from what the Company’s investment managers feel a market participant would use. Examples of other procedures performed include, but are not limited to, initial and ongoing review of third-party pricing services’ methodologies, review of pricing statistics and trends and back testing recent trades.

The Company’s investment managers have analyzed the third-party pricing services’ valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are observable. Due to the lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers’ prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Derivative Instruments

Derivative instruments are fair valued using pricing valuation models for OTC derivatives that utilize independent market data inputs, quoted market prices for exchange-traded derivatives and OTC-cleared derivatives, or independent broker quotations.

The Company performs ongoing analysis of the valuations, assumptions, and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. The Company performs various controls on derivative valuations which include both quantitative and qualitative analyses. Analyses are conducted by a cross-functional group of investment, actuarial, risk and information technology professionals that analyze impacts of changes in the market environment and investigate variances. There is a monthly analysis to identify market value changes greater than pre-defined thresholds, stale prices, missing prices and zero prices. Also on a monthly basis, a second source validation, typically to broker quotations, is performed for certain of the more complex derivatives and all new deals during the month. A model validation review is performed on any new models, which typically includes detailed documentation and validation to a second source. As to certain derivatives that are held by the Company as well as its investment manager’s other clients, the Company’s investment manager performs ongoing analysis of the valuations, assumptions, and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. On a daily basis, the Company’s derivatives collateral agent compares market valuations to counterparty valuations for all OTC derivatives held by the Company for collateral purposes.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated assets and liabilities. Therefore the realized and unrealized gains and losses on derivatives reported in Level 3 may not reflect the offsetting impact of the realized and unrealized gains and losses of the associated assets and liabilities.

Valuation Inputs for Investments

For Level 1 investments, which are comprised of exchange traded securities and open-ended mutual funds, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For the Company’s Level 2 and 3 bonds and stocks, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Derivative instruments are valued using mid-market inputs that are predominantly observable in the market.

Descriptions of additional inputs used in the Company’s Level 2 and Level 3 measurements are included in the following discussion:

Level 2     The fair values of most of the Company’s Level 2 investments are determined by management after considering prices received from third-party pricing services. These investments include mostly bonds and preferred stocks.

Asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities - Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, and credit default swap indices. Commercial and residential mortgage-backed securities prices also include estimates of the rate

NOTES TO FINANCIAL STATEMENTS

of future principal prepayments over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral.

All other corporate bonds, including surplus debentures - Primary inputs also include observations of credit default swap curves related to the issuer, and political events in emerging market economies where applicable.

State, municipalities and political subdivisions - Primary inputs also include Municipal Securities Rulemaking Board reported trades notices, and issuer financial statements.

Interest rate derivatives - Primary input is the swap yield curve.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities primarily backed by sub-prime loans. Also included in Level 3 are securities valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments including structured securities, are consistent with the typical inputs used in Level 2 measurements noted above but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third-party pricing services, including certain municipal securities, foreign government/government agency securities, and bank loans, which are included with corporate bonds. Primary inputs for these long-dated securities are consistent with the typical inputs used in the preceding described Level 1 and Level 2 measurements, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Primary inputs for privately traded equity securities are internal discounted cash flow models utilizing earnings multiples or other cash flow assumptions that are not observable. Significant inputs for Level 3 derivative contracts primarily include the typical inputs used in the preceding Level 1 and Level 2 measurements, but also may include equity and interest volatility, and swap yield curves beyond observable limits.

Separate Account Assets

Guaranteed Separate Account investments for bonds, stocks, mortgage loans and limited partnerships are valued in the same manner, and using the same pricing sources and inputs, as the invested assets held in the General Account of the Company. Non-guaranteed Separate Account assets are primarily invested in mutual funds but also have investments in bonds, stocks, mortgage loans, limited partnerships and other alternative investments. Non-guaranteed Separate Account investments in mutual funds are valued by the underlying mutual funds in accordance to their valuation policies and procedures. Non-guaranteed Separate Account investments in bonds, stocks mortgage loans, limited partnerships and other alternative investments are generally valued by a third party accounting agent in the same manner using the same independent pricing service as the invested assets held in the General Account of the Company.

[1] Excludes investment sales receivable net of investment purchases payable that are not subject to SSAP No. 100 of approximately \$1.8 billion as of December 31, 2024.

The valuation methodologies used to determine the fair values of bonds, stocks and derivatives are described in the above Fair Value Measurements section of this note.

The amortized cost of cash, cash equivalents and short-term investments approximates fair value.

Fair values for mortgage loans on real estate were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

The fair value of contract loans was determined using current loan coupon rates which reflect the current rates available under the contracts. As a result, the fair value approximates the carrying value of the contract loans.

Fair values of liability for deposit-type contracts were estimated using average discounted cash flow calculations and current market interest rates.

The carrying amounts of the Separate Account liabilities approximate their fair values.

D. At June 30, 2025, the Company had no investments where it was not practicable to estimate fair value.

Note 22 - Events Subsequent

In July 2025, the Company entered into a series of transactions with its affiliates, including TLA and TR Re, to effectuate an internal restructuring (the “Corporate Restructuring”). The Company requested and received approval from the Department for the Corporate Restructuring, which included the following actions.

The Company distributed, as an extraordinary dividend valued at approximately \$9 million, 100% of the issued and outstanding shares of Talcott Resolution Distribution Company, Inc (“TDC”) to TR Re.

The Company recaptured an affiliate reinsurance arrangement, originally effective as of October 1, 2021, from TR Re (the “TL/TR Re Reinsurance Agreement”), which generally ceded 50% of the Company’s variable annuity and payout annuity blocks, with certain variable annuity guarantees ceded at 100% and certain structured settlement contracts ceded at a lesser quota share percentage. As a result of the recapture of the TL/TR Re Reinsurance Agreement, the Company recorded recaptured insurance reserves totaling approximately \$537 million previously ceded on a coinsurance funds withheld basis, interest maintenance reserves (“IMR”) balances totaling approximately \$188 million, and reduced the funds withheld under reinsurance treaties with unauthorized reinsurers by approximately \$726 million. The Company also recorded negative ceded premiums totaling approximately \$6.2 billion, partially offset by reserve adjustments on reinsurance of approximately \$5.5 billion for recaptured insurance reserves previously ceded on a modified coinsurance basis. Additionally, the Company paid a recapture fee to TR Re of approximately \$20 million (before tax), subject to final post-closing adjustments.

The Company entered into a reinsurance agreement on a coinsurance and modified coinsurance basis with TLA (the “TL/TLA Reinsurance Agreement”), pursuant to which the Company assumed certain variable annuity and payout reserves from TLA. As a result, the Company recorded insurance reserves totaling approximately \$1.2 billion assumed on a coinsurance basis and IMR balances totaling approximately \$23 million. The Company also recorded assumed premiums totaling approximately \$19.5 billion, partially offset by reserve adjustments on reinsurance of approximately \$18.3 billion for insurance reserves assumed on a modified coinsurance basis. Additionally, the Company paid a ceding commission of approximately \$268 million (before tax) to TLA and recorded an after-tax loss of approximately \$207 million, subject to final post-closing adjustments.

The Company contributed 100% of the issued and outstanding shares of Talcott Resolution International Life Reassurance Corporation (“TIL”), valued at approximately \$13 million, to TLA. The investment in TIL is nonadmitted since TIL is not audited.

The Company distributed, as an extraordinary dividend valued at approximately \$743 million, 100% of the issued and outstanding shares of TLA to TR Re.

TR Re, distributed 100% of the issued and outstanding shares of the Company, to TLI, which following the Corporate Restructuring, is the Company’s direct parent.

The Company had no other material subsequent events through the filing date of August 14, 2025.

Note 23 - Reinsurance

a. Ceded Reinsurance Report

Section 2 - Ceded Reinsurance Report - Part A

- The Company has one reinsurance agreement in effect under which the reinsurer has a limited right to unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits. See Note 1 for further discussion of prescribed practices.
  - For the periods ended June 30, 2025, and December 31, 2024, the estimated amount of the aggregate reduction in surplus of this limited right to unilaterally cancel this reinsurance agreement by the reinsurer for which cancellation results in a net obligation of the Company to the reinsurer, and for which such obligation is not presently accrued was \$1,743,161 and \$5,213,542, respectively.
  - For the periods ended June 30, 2025, and December 31, 2024, the total amount of reinsurance credit taken for this agreement was \$2,206,533 and \$6,599,420, respectively.
