NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Talcott Resolution Life Insurance Company (the "Company" or "TL") have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department ("the Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed practices by the State of Connecticut.

A difference prescribed by Connecticut state law allows the Company and its wholly-owned subsidiary, Talcott Resolution Life and Annuity Insurance Company ("TLA"), to receive a reinsurance reserve credit for reinsurance treaties that provide for a limited right of unilateral cancellation by the reinsurer. Even if the Company and/or TLA did not obtain reinsurance reserve credit for these reinsurance treaties, the Company's and TLA's risk-based capital would not have triggered a regulatory event.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed by the Department is shown below:

	SSAP #	F/S Page	F/S Line #	2024	2023
Net Income					
1. TL state basis (Page 4, Line 35, Columns 1 & 2)	XXX	XXX	XXX	$ 531,146,517	$ 125,597,037
2. State prescribed practices that are an (increase)/decrease from NAIC SAP:

				(2,976,629)	2,256,095
3. State permitted practices that are an (increase)/decrease from NAIC SAP				—	—
4. NAIC SAP (1-2-3=4)	XXX	XXX	XXX	$ 534,123,146	$ 123,340,942
Surplus					
5. TL state basis (Page 3, Line 38, Columns 1 & 2)	XXX	XXX	XXX	$ 1,739,867,832	$ 2,188,032,576
6. State prescribed practices that are an (increase)/decrease from NAIC SAP:					
Less: Reinsurance reserve credit (TL) (as described above)	61R	3	1	5,213,542	8,190,171
Less: Reinsurance reserve credit (TLA) (as described above)	61R	3	35	20,957,376	18,386,767
				26,170,918	26,576,938
7. State permitted practices that are an (increase)/decrease from NAIC SAP				—	—
8. NAIC SAP (5-6-7=8)	XXX	XXX	XXX	$ 1,713,696,914	$ 2,161,455,638

The Company's reported investment in TLA was $626,632,214 and $886,939,559 as of December 31, 2024 and December 31, 2023, respectively. The Company's investment in TLA would have been reported as $605,674,838 and $868,552,792 as of December 31, 2024 and December 31, 2023, respectively, without the state prescribed practices.

The Company does not follow any other prescribed or permitted statutory accounting practices that have a material effect on statutory surplus, statutory net income or risk-based capital of the Company.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with the National Association of Insurance Commissioners ("NAIC") Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates. The most significant estimates include those used in determining the liability for aggregate reserves for life and health policies, evaluation of other-than-temporary impairments, valuation of derivatives, and contingencies relating to corporate litigation and regulatory matters. Certain of these estimates are particularly sensitive to market conditions, and deterioration and/or volatility in the worldwide debt or equity markets could have a material impact on the statutory-basis financial statements. Although some variability is inherent in these estimates, management believes the amounts provided are adequate.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Cash flows from derivative instruments and associated gains and losses are presented within Miscellaneous proceeds or Miscellaneous applications within the cash from investments section.

In addition, the Company uses the following accounting policies:

1. Short-term investments include investments whose remaining maturities, at the time of acquisition, are one year or less and are stated at amortized cost. Cash equivalents include investments whose remaining maturities , at time of acquisition, are 90 days or less and are stated at amortized cost. Cash equivalents also include money market instruments which are carried at fair value.

2. Other than loan-backed and structured securities, investments in unaffiliated bonds and surplus debentures rated in NAIC classes 1 through 5 are carried at amortized cost, and unaffiliated bonds rated in NAIC class 6 are carried at the lower of amortized cost or fair value. Perpetual bonds which do not possess or no longer possess an effective call option are carried at fair value, regardless of NAIC designation.

3. Unaffiliated common stocks are carried at fair value. For Federal Home Loan Bank (FHLB) capital stock, the fair value is presumed to be par, unless considered other-than-temporary impaired.

4. Highest-quality, high-quality or medium quality redeemable preferred stocks (NAIC designations 1 to 3) are valued at amortized cost. All other redeemable preferred stocks (NAIC designations 4 to 6) are reported at the lower of amortized cost or fair value. Perpetual preferred stocks and publicly traded preferred stock warrants are valued at fair value, not to exceed any currently effective call price.

5. Mortgage loans on real estate are carried at the outstanding principal balance, less any allowances for credit losses.

6. Loan-backed bonds and structured securities, excluding residual tranches or interests, are carried at amortized cost, except those rated in NAIC class 6, which are carried at the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43, Loan-Backed and Structured Securities. Significant

changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method, except for highly rated securities, which use the retrospective method. Residual tranches or interests are carried as other invested assets at the lower of amortized cost or fair value.

7. Investment in subsidiaries, controlled and affiliated ("SCA") companies are based on the net worth of the subsidiary in accordance with SSAP No. 97 - Investment in Subsidiary, Controlled and Affiliated Entities. The change in the carrying value is recorded as a change in net unrealized capital gains (losses), a component of unassigned surplus.

8. The Company carries its investments in unaffiliated joint ventures, investment partnerships and limited liability companies based upon audited financial statements in accordance with SSAP No. 48 - Joint Ventures, Partnerships and Limited Liability Companies.

9. For certain derivative instruments accounted for in accordance with SSAP No. 86 - Derivatives ("SSAP No. 86"), on the date the derivative contract is entered into, the Company designates the derivative as hedging, replication, or held for other investment and/or risk management activities. The Company's derivative transactions are permitted uses of derivatives under the derivative use plans required by the Department and the New York State Department of Financial Services.

   Derivatives used in hedging relationships are accounted for in a manner consistent with the hedged item. Typically, cost paid or consideration received at inception of a contract is reported on the balance sheet as a derivative asset or liability, respectively. Periodic cash flows and accruals are recorded in a manner consistent with the hedged item.

   Derivatives used in replication relationships are accounted for in a manner consistent with the cash instrument and the replicated asset. Typically, cost paid or consideration received at inception of the contract is recorded on the balance sheet as a derivative asset or liability, respectively. Periodic cash flows and accruals of income/expense are recorded as a component of derivative net investment income. Upon termination of the derivative, any gain or loss is recognized as a derivative capital gain or loss.

   Derivatives used in income generation relationships are accounted for in a manner consistent with the associated covered asset. Typically, consideration received at inception of the contract is recorded on the balance sheet as a derivative liability. Periodic cash flows and accruals of income/expense are recorded as a component of derivative net investment income. Upon termination, any remaining derivative liability, along with any disposition payments are recorded as a derivative capital gain or loss.

   Derivatives held for other investment and/or risk management activities are reported at fair value in accordance with SSAP No. 86 and the changes in fair value are recorded in derivative unrealized gains and losses. Periodic cash flows and accruals of income/expense are recorded as components of derivative net investment income.

   Certain derivative instruments are accounted for in accordance with SSAP No. 108 - Derivatives Hedging Variable Annuity Guarantees ("SSAP No. 108") and reported at fair value. The Company has elected to adopt SSAP No. 108 for certain limited derivative instruments hedging variable annuity guarantees subject to fluctuations as a result of interest rate sensitivity. These derivative instruments are highly effective in achieving offsetting changes in fair value attributed to the hedged risk during the period that the hedge is designated. Changes in value of the derivative instrument attributable to the hedged risk that offset the current period change in the designated portion of the hedged liability are recorded in net realized capital gains (losses). Change in value of the derivative instruments attributable to the hedged risk that do not offset the current period change in the designated portion of the hedged liability are recognized as deferred assets and deferred liabilities. Changes in value of the derivative instruments that are not attributable to the hedged risk, are recognized as unrealized gains or unrealized losses.

10. The Company considers anticipated investment income as a factor in the premium deficiency calculation in accordance with SSAP No. 54, Individual and Group Accident and Health Contracts.

11. The Company establishes and carries as liabilities actuarially determined reserves which are calculated to meet the Company's future obligations. Reserves for accident and health contracts are based on actuarially recognized methods. Tabular liabilities use prescribed morbidity tables in general use in the United States, which are modified to reflect the Company's actual experience when appropriate. These reserves are computed at amounts that, with additions from estimated premiums to be received and with interest on such reserves compounded annually at certain assumed rates, are expected to be sufficient to meet the Company's policy obligations at their maturities or in the event of an insured's death or disability.

    Other than modified coinsurance, reserves are reported net of reinsurance ceded. For modified coinsurance, assets and liabilities associated with the reinsured business remain on the balance sheet of the Company in segregated portfolios.

12. The Company follows accounting for implementation costs incurred in a cloud computing arrangement that is a service contract in accordance with SSAP No. 16 – Electronic Data Processing Equipment and Software. Implementation costs for service contracts are capitalized as nonoperating system software and as a nonadmitted asset and will be recognized as each component of the hosting arrangement is ready for its intended use. Hosting arrangements that are service contracts will be amortized over the lesser of the term of the hosting agreement or up to five years.

13. The Company has no pharmaceutical rebate receivables.

14. The Company writes down the book value of investments when declines in values are considered to be other than temporary impairments (OTTI).

    Bonds:

    The Company evaluates OTTI by conducting a quarterly analysis of bonds. The Company considers the following factors, where applicable depending on the type of securities, in the evaluation of whether a decline in value is other than temporary: (a) the likelihood that the Company will be able to collect all amounts due according to the contractual terms of the debt security; (b) the present value of the expected future cash flows of the security; (c) the characteristics, quality and value of the underlying collateral or issuer securing the position; (d) collateral structure; (e) the length of time and extent to which the fair value has been below amortized cost; (f) the financial condition and near-term prospects of the issuer; (g) adverse conditions related to the security or industry; (h) the rating of the security; (i) the Company's ability and intent to hold the investment for a period of time sufficient to allow for an anticipated recovery to amortized cost; and (j) other qualitative and quantitative factors in determining the existence of OTTI including, but not limited to, unrealized loss trend analysis and significant short-term changes in value.

    Mortgage Loans:

    The Company performs internal reviews quarterly to determine if individual mortgage loans are performing or nonperforming. Mortgage loans are considered to be impaired when, based upon current available information and events, it is probable that the Company will be unable to collect all amounts of principal and interest due according to the contractual terms of the mortgage loan agreement. A valuation allowance is recorded on a loan-by-loan basis in net unrealized capital losses for the excess of the carrying value of the mortgage loan over the fair value of its underlying collateral. Collectability and estimated decreases in collateral values are also assessed on a loan-by-loan basis considering all events and conditions relevant to the loan. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revisions as more information becomes available, as changes occur in the market or as negotiations with the borrowing entity evolve. If there is a change in the fair value of the underlying collateral or the estimated loss on the loan, the valuation allowance is adjusted accordingly. An OTTI occurs upon the realization of a credit loss, typically through foreclosure or after a decision is made to accept a discounted payoff, and is recognized in realized capital losses. The previously recorded valuation allowance is reversed from unrealized capital losses. When an OTTI is recorded, a new cost basis is established reflecting estimated value of the collateral.

    Joint Ventures, Partnerships, and LLCs:

When it is probable that the Company will be unable to recover the outstanding carrying value of an investment based on undiscounted cash flows, or there is evidence indicating an inability of the investee to sustain earnings to justify the carrying value of the investment, OTTI is recognized in realized capital losses reflecting the excess of the carrying value over the estimated fair value of the investment. The estimated fair values of limited partnership interests are generally based on the Company's share of the net asset value (NAV) as provided in the financial statements of the investees.

15. The Company enters into repurchase agreements from time to time. For the accounting policy refer to Note 5.F.1.

D. Going Concern

The Company is not aware of any conditions or events which raise substantial doubts concerning the Company's ability to continue as a going concern.

Note 2 - Accounting Changes and Corrections of Errors

Accounting Changes

In 2024, the NAIC modified SSAP No. 15 – Debt and Holding Company Obligations to require additional disclosures related to unused commitments and lines of credit, disaggregated by short and long-term commitments. The Company adopted this guidance in 2024, however, it is not material to the Company.

In 2024, the NAIC modified SSAP No. 86 – Derivatives to require additional disclosures identifying where cash flows associated with derivative transactions are presented in the Statement of Cash Flow. The Company adopted this guidance in 2024, however, it is not material to the Company.

In 2023, the NAIC modified SSAP No. 34 – Investment Income Due and Accrued to require additional disclosures to capture gross, non-admitted and admitted amounts of accrued interest income and to separately identify the cumulative amount of paid-in-kind interest income included in the current principal balance. The guidance is effective December 31, 2023. The Company adopted this guidance in 2023, however, it is not material to the Company.

In 2023, the NAIC modified SSAP No. 43 - Loan-Backed and Structured Securities to add collateralized loan obligations (CLO) to the financial modeling guidance and clarify CLOs are not captured as legacy securities. This guidance is effective December 31, 2023 and will eventually result in CLOs no longer being eligible to use credit rating provider ratings to determine NAIC designation. The Company adopted this guidance in 2023, but effects of the guidance will not have an impact until CLO modeling methodology is implemented by the Securities Valuation Office.

In 2023, the NAIC modified several statutory statements to ensure consistency in the reporting of residual interests, irrespective of legal form. The changes incorporate the 2022 principles-based definition of residual interests, which are characterized as investments in structures backed by a discrete pool of collateral assets, where cash flows first provide principal and interest payments to debt holders, with remaining funds provided to holders of residual interests. The changes modify the following statutory statements: SSAP No. 30 – Common Stock, SSAP No. 32 – Preferred Stock, SSAP 43 – Loan-Backed and Structured Securities, and SSAP No. 48 – Joint Ventures, Partnerships and Limited Liability Companies. All changes are effective December 31, 2023. The Company adopted this guidance in 2023 and identified approximately $86.8 million of residual interests.

Recently Issued Accounting Standards

In 2024, the NAIC modified SSAP No. 21 – Other Admitted Assets to prescribe a measurement framework for all residual interests regardless of legal form and provide guidance for admitting debt securities that do not qualify as bonds or asset-backed securities under principles-based guidance within SSAP 26 or SSAP 43, respectively. The Company is currently evaluating the impact of the changes. The Company will adopt the revised standards effective January 1, 2025; however, the Company does not expect the changes to have a material impact to the financial statements.

In 2023, the NAIC adopted revisions to several statutory statements to finalize guidance throughout applicable standards related to the updated definition of a bond. The changes incorporate a principles-based definition which categorizes bonds as either issuer credit obligations or asset-backed securities. The changes primarily modify the following statutory statements: SSAP No. 26 – Bonds and SSAP No. 43 – Loan-Backed and Structured Securities, and in conjunction with the changes modify the title of SSAP No. 43 to Asset-Backed Securities. The Company will adopt the revised standards effective January 1, 2025 and classify investments in accordance with the new principles; however, the Company does not expect the changes to have a material impact to statutory surplus.

4. **Security Unrealized Loss Aging**

All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non–interest related declines when a non–recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	$ 3,903,998

As of December 31, 2024, loan-backed securities in an unrealized loss position comprised 462 securities, primarily related to commercial mortgage-backed securities ("CMBS"), residential mortgage-backed securities ("RMBS"), and collateralized loan obligations ("CLO"), which were depressed primarily due to higher interest rates and/or widening of credit spreads since the securities were purchased. The Company does not intend to sell the securities outlined above. Furthermore, based upon the Company's cash flow modeling and the expected continuation of contractually required principal and interest payments, the Company has deemed these securities to be temporarily impaired as of December 31, 2024.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

1. For Dollar Repurchase agreements, Company policies require a minimum of 95% of the fair value of securities transferred under repurchase agreements to be maintained as collateral. For securities lending agreements, Company policies require a minimum of 102% of the fair value of the securities loaned at the outset of the contract be held as collateral. The agreements with third parties contain contractual provisions to allow for additional collateral to be obtained when necessary. Cash collateral received is invested in high quality investments and the offsetting collateral liability is included in Payables for securities lending.

2. The Company did not pledge any of its assets as collateral as of December 31, 2024 and 2023.

3. The Company did not accept collateral that is permitted by contract or custom to sell or repledge as of December 31, 2024 and 2023.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

1. Company Policies or Strategies for Repurchase Programs

From time to time, the Company enters into repurchase agreements to manage liquidity or to earn incremental income. A repurchase agreement is a transaction in which one party (transferor) agrees to sell securities to another party (transferee) in return for cash (or securities), with a simultaneous agreement to repurchase the same securities at a specified price at a later date. These transactions generally have a contractual maturity of ninety days or less. Repurchase agreements include master netting provisions that provide both counterparties the right to offset claims and apply securities held by them with respect to their obligations in the event of a default. Although the Company has the contractual right to offset claims, the Company's current positions do not meet the specific conditions for net presentation.

Under repurchase agreements, the Company transfers collateral of U.S. government, government agency and corporate securities and receives cash. For repurchase agreements, the Company obtains cash in an amount equal to at least 95% of the fair value of the securities transferred. The agreements require additional collateral to be transferred when necessary and provide the counterparty the right to sell or re-pledge the securities transferred. The cash received from the repurchase program is typically invested in short-term investments or fixed maturities and is reported as an asset on the Company's consolidated balance sheets. The Company accounts for the repurchase agreements as collateralized borrowings. The securities transferred under repurchase agreements are included in bonds, with the obligation to repurchase those securities recorded in Other liabilities on the Company's consolidated balance sheets.

From time to time, the Company enters into reverse repurchase agreements where the Company purchases securities and simultaneously agrees to resell the same or substantially the same securities. The agreements require additional collateral to be transferred to the Company when necessary and the Company has the right to sell or re-pledge the securities received as collateral. The Company accounts for reverse repurchase agreements as collateralized financing.

Note 8 - Derivative Instruments

Overview

The Company utilizes a variety of Over-the counter ("OTC") derivatives, including OTC-cleared transactions, and exchange-traded derivative instruments as part of its overall risk management strategy. The types of instruments may include swaps, caps, floors, forwards, futures and options to achieve one of four Company-approved objectives: to hedge risk arising from interest rate, equity market, credit spread and issuer default, price or currency exchange rate risk or volatility; to manage liquidity; to control transaction costs; or to enter into replication transactions. On the date the derivative contract is entered into, the Company designates the derivative as hedging (fair value, cash flow, or net investment in a foreign operation), replication, or held for other investment and/or risk management activities, which primarily involves managing asset or liability related risks which do not qualify for hedge accounting under SSAP No. 86. The Company's derivative transactions are used in strategies permitted under the derivative use plans required by the Department and the New York State Department of Financial Services.

Interest rate, equity, and index swaps involve the periodic exchange of payments with other parties, at specified intervals, calculated using agreed upon rates or indices and notional principal amounts. Generally, no cash or principal payments are exchanged at the inception of the contract. Typically, at the time a swap is entered into, the cash flow streams exchanged by the counterparties are equal in value.

Credit default swaps entitle one party to receive a periodic fee in exchange for an obligation to compensate the other party should a credit event occur on the part of the referenced issuer.

Financial futures are standardized commitments to either purchase or sell designated financial instruments at a future date for a specified price and may be settled in cash or through delivery of the underlying instrument. Futures contracts trade on organized exchanges. Margin requirements for futures are met by pledging securities or cash, and changes in the futures' contract values are settled daily in cash.

Option contracts grant the purchaser, for a premium payment, the right to either purchase from or sell to the issuer a financial instrument at a specified price, within a specified period or on a stated date.

Swaption contracts grant the purchaser, for a premium payment, the right to enter into an interest rate swap with the issuer on a specified future date.

Foreign currency swaps exchange an initial principal amount in two currencies, agreeing to re-exchange the currencies at a future date, at an agreed upon exchange rate. There may also be a periodic exchange of payments at specified intervals calculated using agreed upon rates and exchanged principal amounts.

The Company clears interest rate swap and certain credit default swap derivative transactions through central clearing houses. OTC-cleared derivatives require initial collateral at the inception of the trade in the form of cash or highly liquid collateral, such as U.S. Treasuries and government agency investments. Central clearing houses also require additional cash collateral as variation margin based on daily market value movements. In addition, OTC-cleared transactions include price alignment interest either received or paid on the variation margin, which is reflected in net investment income.

Strategies

The notional value, fair value, and carrying value of derivative instruments used during the years 2024 and 2023 are disclosed in the table presented below. During the years 2024 and 2023, the Company did not transact in or hold any positions related to net investment hedges in a foreign operation or income generation transactions. The notional amounts of derivative contracts represent the basis upon which pay or receive amounts are calculated and are not reflective of credit risk. The fair value of derivative instruments are based upon widely accepted pricing valuation models which utilize independent third-party data as inputs or independent broker quotations. The Company did not have any unrealized gains or losses during the reporting period representing the component of the derivative instruments gain or loss from derivatives that no longer qualify for hedge accounting.

Cash Flow Hedges

Interest rate swaps and index swaps: Interest rate swaps and index swaps are primarily used to convert interest receipts on floating-rate fixed maturity investments and liabilities to fixed rates or other floating rates. There were no gains and losses classified in unrealized gains and losses related to cash flow hedges that have been discontinued because it was no longer probable that the original forecasted transactions would occur by the end of the originally specified time period.

Foreign currency swaps: Foreign currency swaps are used to convert foreign denominated cash flows associated with certain foreign denominated fixed maturity investments and liabilities to U.S. dollars. The foreign fixed maturities and liabilities are primarily denominated in euros and British pounds and are hedged to minimize cash flow fluctuations due to changes in currency rates. There were no gains and losses classified in unrealized gains and losses related to cash flow hedges that have been discontinued because it was no longer probable that the original forecasted transactions would occur by the end of the originally specified time period.

Replication Transactions

Credit default swaps: The Company periodically enters into credit default swaps that assume credit risk as part of replication transactions. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that are permissible investments under the Company's investment policies.

Interest rate swaps: The Company periodically enters in interest rate swaps as part of replication transactions to reproduce the investment characteristics of permissible investments.

Other Investment and/or Risk Management Activities

Interest rate and index swaps, and swaptions: The Company enters into interest rate swaps, index swaps, and swaptions to manage duration between assets and liabilities. In addition, the Company may enter into interest rate swaps to terminate existing swaps in hedging relationships, thereby offsetting the changes in value in the original swap.

Macro hedge program: The Company utilizes equity options, swaps, futures, and foreign currency options to hedge against a decline in the equity markets and the resulting statutory surplus and capital impact primarily arising from Guaranteed Minimum Death Benefit ("GMDB") and GMWB obligations. Included are equity options with financing premiums for which the premium is paid at the end of the derivative contract.

The premium payments for derivatives with financing premiums due within the next four years are listed in the table below, as well as the undiscounted premium commitments, the fair value of these contracts and the aggregate fair value excluding the impact of these premiums as of December 31, 2024 and 2023, respectively.

Credit Risk

The Company's derivative counterparty exposure policy establishes market-based credit limits, favors long-term financial stability and creditworthiness of the counterparty and typically requires credit enhancement/credit risk reducing agreements. The Company minimizes the credit risk in derivative instruments by entering into transactions with high quality counterparties rated A or better, which are monitored and evaluated by the Company's risk management team and reviewed by senior management. OTC-cleared transactions reduce risk due to their ability to require daily variation margin, monitor the Company's ability to request additional collateral in the event of a counterparty downgrade, and act as an independent valuation source.

The Company has developed credit exposure thresholds which are based upon counterparty ratings. Credit exposures are measured using the market value of the derivatives, resulting in amounts owed to the Company by its counterparties or potential payment obligations from the Company to its counterparties. Credit exposures are generally quantified daily based on the prior business day's market value and collateral is pledged to and held by, or on behalf of, the Company to the extent the current value of derivatives exceeds the contractual thresholds. In accordance with industry standards and the contractual agreements, collateral is typically settled on the next business day. The Company may have exposure to credit risk for amounts below the exposure thresholds which are uncollateralized, as well as for market fluctuations that may occur between contractual settlement periods of collateral movements.

Counterparty exposure thresholds are developed for each of the counterparties based upon their ratings. In addition, the Company monitors counterparty credit exposure on a monthly basis to ensure compliance with Company policies and statutory limitations. The Company also generally requires that derivative contracts, other than exchange traded contracts, OTC-cleared swaps, certain forward contracts, and certain embedded and reinsurance derivatives, be governed by an International Swaps and Derivatives Association Master Agreement which is structured by legal entity and by counterparty and permits right of offset.

Derivative instruments have off-balance sheet risk. The notional value, market value exposure, counterparty and other trade terms are available in Schedule DB, Derivative Instruments, for each individual derivative contract.

The Company does not have excluded components of derivatives.

B. Derivatives under SSAP No. 108 - Derivative Hedging Variable Annuity Guarantees

(1) Discussion of Hedged Item/Hedging Instruments and Hedging Strategy

0001 Interest Rate Hedge

Present Value of Future Cash Flows of Certain Variable Annuity Contracts:

The hedged item consists of a portion of the Company's variable annuity block of business, including related minimum benefit guarantees, that is sensitive to interest rate movement. The hedged portion of the block is reviewed on a monthly basis and the hedge effectiveness is measured quarterly based on the ratio of the percentage change in asset interest rate risk (rho) compared to the percentage change in the liability interest rate risk (rho). The related hedging instrument is a portfolio of interest rate derivatives which follows a semi-static hedging strategy. Changes in interest rates impact the present value of the future product cash flows.

The Company will recognize a deferred asset within Other assets or a deferred liability within Other liabilities on the Statements of Admitted Assets, Liabilities and Capital and Surplus, for fluctuations in fair value that do not offset the changes in the liability. The deferred asset or liability will then be amortized over the timeframe required under SSAP No. 108, which is the Macaulay duration of guarantee benefit cash flows, or approximately 8 years.

The hedging strategy is compliant with VM-21 and meets all the criteria to be defined as a clearly defined hedging strategy as required by SSAP No. 108. Hedge effectiveness is measured in accordance with SSAP No. 108 on a quarterly basis, both prospectively and retrospectively, and remains highly effective as of December 31, 2024.

B. FHLB (Federal Home Loan Bank) Agreements

1. The Company is a member of the Federal Home Loan Bank of Boston ("FHLB"). Membership allows the Company access to collateralized advances, which may be used to support various spread-based businesses or to enhance liquidity management. FHLB membership requires the Company to own member stock and borrowings require the purchase of activity-based stock in an amount (generally between 3% and 4% of the principal balance) based upon the term of the outstanding advances. FHLB stock held by the Company is classified within Page 2, Line 2.2 (Common stocks) in the General Account. As of December 31, 2024, there were no advances outstanding.

State law limits the Company's ability to pledge, hypothecate or otherwise encumber its assets. The amount of advances that can be taken by the Company are dependent on the assets pledged by the Company to secure the advances, and are therefore subject to this legal limit. The pledge limit is recalculated annually based on statutory admitted assets and capital and surplus. For 2024, the Company's borrowing capacity is $435 million. B. Assessments

1. Liability and Related Asset

In all states, insurers licensed to transact certain classes of insurance are required to become members of a guaranty fund. In most states, in the event of the insolvency of an insurer writing any such class of insurance in the state, members of the funds are assessed to pay certain claims of the insolvent insurer. A particular state's fund assesses its members based on their respective written premiums in the state for the classes of insurance in which the insolvent insurer was engaged. Assessments are generally limited for any year to one or two percent of premiums written per year, depending on the state.

Under insurance guaranty fund laws in each state, the District of Columbia and Puerto Rico, insurers licensed to do business can be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Part of the assessments paid by/refunded to the Company pursuant to these laws may be used as credits for a portion of the associated premium taxes. The Company paid/(received) guaranty fund assessments of approximately $1,511,515 and $39,158 in 2024 and 2023, respectively. The Company had a guaranty fund receivable of $1,360,742 and $331,013 as of December 31, 2024 and 2023, respectively.

On August 15, 2023, Talcott Resolution Life Insurance Company and Talcott Resolution Life and Annuity Insurance Company (collectively "Talcott Resolution") were named as defendants in a putative class action lawsuit in the United States District Court for the District of Massachusetts. The case is captioned as Casey v. Talcott Resolution Life Insurance Company and Talcott Resolution Life and Annuity Insurance Company, et al. (MA). The lawsuit relates to data security events involving the MOVEit file transfer system ("MOVEit Cybersecurity Incident"). The MOVEit file transfer system is software used by a broad range of companies to move sensitive electronic data. PBI Research Services ("PBI"), a former third-party service provider for Talcott Resolution, used the MOVEit file transfer system in the performance of its services. PBI used the software on behalf of Talcott Resolution to, among other things, search various databases to identify the deaths of insured persons and annuitants under life insurance policies and annuity contracts, respectively, as required by applicable law. Plaintiffs seek to represent various classes and subclasses of Talcott Resolution insurance policy and annuity contract holders whose data allegedly was accessed or potentially accessed in connection with the MOVEit Cybersecurity Incident. Plaintiffs allege that Talcott Resolution breached a purported duty to safeguard their sensitive data from unauthorized access. The complaints assert claims for, among other things, negligence, negligence per se, breach of contract, unjust enrichment, and violations of various consumer protection statutes, and the Plaintiffs seek declaratory and injunctive relief, compensatory and punitive damages, restitution, attorneys' fees and costs, and other relief. On October 4, 2023, the Judicial Panel on Multidistrict Litigation issued an order consolidating all actions relating to the MOVEit Cybersecurity Incident before a single federal judge in the United States District Court for the District of Massachusetts. We intend to vigorously defend these actions.

The Company is or may become involved in various legal actions, some of which assert claims for substantial amounts. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses and costs of defense, will not be material to the financial condition of the Company.

For additional information, please refer to the current and periodic reports filed by the Company with the United States Securities and Exchange Commission.

Note 20 - Fair Value Measurements

A. Fair Value Measurements

Fair value is determined based on the "exit price" notion which is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. Financial instruments carried at fair value in the Company's financial statements include certain bonds, stocks, derivatives, and Separate Account assets.

The Company utilizes the services of third-party investment managers, including Hartford Investment Management Company ("HIMCO"), Pacific Investment Management Company, LLC ("PIMCO"), Hunter Point Capital GPFS LP ("Hunter Point"), and Sixth Street Insurance Solutions, L.P., that are registered investment advisers under the Investment Advisers Act of 1940. The Company's Investment Valuation Committee ("IVC"), a working group chaired by the Chief Financial Officer ("CFO") of the Talcott Financial Group Investments, LLC subsidiaries, oversees the investment activities of these investment managers and directs other investments to maximize economic value and generate the returns necessary to support the Company's various product obligations, within internally established objectives, guidelines and risk tolerances. The portfolio objectives and guidelines are developed, by the Company, based upon the asset/liability profile, including duration, convexity and other characteristics within specified risk tolerances. The risk tolerances considered include, but are not limited to, asset sector, credit issuer allocation limits, and maximum portfolio limits for below investment grade holdings. The Company attempts to minimize adverse impacts to the investment portfolio and the Company's results of operations from changes in economic conditions through asset diversification, asset allocation limits, and asset/liability duration matching and the use of derivatives. The following section applies the fair value hierarchy and disclosure requirements for the Company's Separate Account assets, and categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2, or 3):

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date.

Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or liability, or prices for similar assets and liabilities.

Level 3 Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of amounts that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company's investment manager will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g. changes in risk assumptions) inputs are used in determination of fair values that the Company's investment manager has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's bonds included in Level 3 are classified as such because these securities are primarily within illiquid markets and/or priced by independent brokers.

1. The following table presents assets and (liabilities) carried at fair value by hierarchy level:

December 31, 2024					
(Amounts in thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Net Asset Value (NAV)	Total

Valuation Techniques, Procedures and Controls

The Company determines the fair values of certain financial assets and liabilities based on quoted market prices where available and where prices represent reasonable estimates of fair value. The Company also determines fair values based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments listed in the preceding tables.

The fair value process is monitored by the respective Valuation Committees of the Company's investment managers, which are comprised of senior management that meets at least quarterly. The purpose of the committee is to oversee the pricing policy and procedures by ensuring objective and reliable valuation practices and pricing of financial instruments as well as addressing valuation issues and approving changes to valuation methodologies and pricing sources.

In addition, the IVC is responsible for the approval and monitoring of the Valuation Policy of the Company as well as the adjudication of any valuation disputes thereunder. The Valuation Policy addresses valuation of all financial instruments held in the general account and guaranteed separate accounts of the Company, including all derivative positions. The IVC meets regularly, and its members include a cross-functional group of senior management as well as various investment, accounting, finance, and risk management professionals.

The Company also has an enterprise-wide Operational Risk Management function with Enterprise Risk Management ("ERM") which is responsible for establishing, maintaining and communicating the framework, principles and guidelines of the Company's operational risk management program. The Enterprise Model Oversight Working Group ensures compliance with the ERM framework by providing an independent review of the suitability, characteristics and reliability of model inputs as well as an analysis of significant changes to current models.

Bonds and Stocks

The fair values of bonds and stocks in an active and orderly market (e.g., not distressed or forced liquidation) are determined by the Company's investment managers using a "waterfall" approach utilizing the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal matrix pricing processes. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities' relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

Prices from third-party pricing services may be unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

The Company's investment managers utilize an internally developed matrix pricing process for private placement securities for which the Company is unable to obtain a price from a third-party pricing service. The process is similar to the third-party pricing services. The Company's investment managers develop credit spreads each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing independent public security index and trade information and adjusting for the non-public nature of the securities. Credit spreads combined with risk-free rates are applied to contractual cash flows to develop a price.

The Company's investment managers perform ongoing analyses of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. In addition, the Company's investment managers ensure that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models utilizing spreads, and when available, market indices. As a result of these analyses, if the Company's investment managers determine that there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly and approved by the Valuation Committee of the Company's investment managers.

The Company's investment managers conduct other specific monitoring controls around pricing. Daily, weekly and monthly analyses identify price changes over pre-determined thresholds for bonds and equity securities. Monthly analyses identify prices that have not changed, and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differs from what the Company's investment managers feel a market participant would use. Examples of other procedures performed include, but are not limited to, initial and ongoing review of third-party pricing services' methodologies, review of pricing statistics and trends and back testing recent trades.

The Company's investment managers have analyzed the third-party pricing services' valuation methodologies and related inputs, and have also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs.

Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are observable. Due to the lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Derivative Instruments

Derivative instruments are fair valued using pricing valuation models for OTC derivatives that utilize independent market data inputs, quoted market prices for exchange-traded derivatives and OTC-cleared derivatives, or independent broker quotations.

The Company performs ongoing analysis of the valuations, assumptions, and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. The Company performs various controls on derivative valuations which include both quantitative and qualitative analyses. Analyses are conducted by a cross-functional group of investment, actuarial, risk and information technology professionals that analyze impacts of changes in the market environment and investigate variances. There is a monthly analysis to identify market value changes greater than pre-defined thresholds, stale prices, missing prices and zero prices. Also on a monthly basis, a second source validation, typically to broker quotations, is performed for certain of the more complex derivatives and all new deals during the month. A model validation review is performed on any new models, which typically includes detailed documentation and validation to a second source. As to certain derivatives that are held by the Company as well as its investment manager's other clients, the Company's investment manager performs ongoing analysis of the valuations, assumptions, and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. On a daily basis, the Company's derivatives collateral agent compares market valuations to counterparty valuations for all OTC derivatives held by the Company for collateral purposes.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated assets and liabilities. Therefore the realized and unrealized gains and losses on derivatives reported in Level 3 may not reflect the offsetting impact of the realized and unrealized gains and losses of the associated assets and liabilities.

Valuation Inputs for Investments

For Level 1 investments, which are comprised of exchange traded securities and open-ended mutual funds, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For the Company's Level 2 and 3 bonds and stocks, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Derivative instruments are valued using mid-market inputs that are predominantly observable in the market.

Descriptions of additional inputs used in the Company's Level 2 and Level 3 measurements are included in the following discussion:

Level 2 The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third-party pricing services. These investments include mostly bonds and preferred stocks.

Asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities - Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, and credit default swap indices. Commercial and residential mortgage-backed securities prices also include estimates of the rate of future principal prepayments over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral.

All other corporate bonds, including surplus debentures - Primary inputs also include observations of credit default swap curves related to the issuer, and political events in emerging market economies where applicable.

State, municipalities and political subdivisions - Primary inputs also include Municipal Securities Rulemaking Board reported trades notices, and issuer financial statements.

Interest rate derivatives - Primary input is the swap yield curve.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities primarily backed by sub-prime loans. Also included in Level 3 are securities valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments including structured securities, are consistent with the typical inputs used in Level 2 measurements noted above but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third-party pricing services, including certain municipal securities, foreign government/government agency securities, and bank loans, which are included with corporate bonds. Primary inputs for these long-dated securities are consistent with the typical inputs used in the preceding described Level 1 and Level 2 measurements, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Primary inputs for privately traded equity securities are internal discounted cash flow models utilizing earnings multiples or other cash flow assumptions that are not observable. Significant inputs for Level 3 derivative contracts primarily include the typical inputs used in the preceding Level 1 and Level 2 measurements, but also may include equity and interest volatility, and swap yield curves beyond observable limits.

Separate Account Assets

Guaranteed Separate Account investments for bonds, stocks, mortgage loans and limited partnerships are valued in the same manner, and using the same pricing sources and inputs, as the invested assets held in the General Account of the Company. Non-guaranteed Separate Account assets are primarily invested in mutual funds but also have investments in bonds, stocks, mortgage loans, limited partnerships and other alternative investments. Non-guaranteed Separate Account investments in mutual funds are valued by the underlying mutual funds in accordance to their valuation policies and procedures. Non-guaranteed Separate Account investments in bonds, stocks mortgage loans, limited partnerships and other alternative investments are generally valued by a third party accounting agent in the same manner using the same independent pricing service as the invested assets held in the General Account of the Company.

[1]Excludes investment sales receivable net of investment purchases payable that are not subject to SSAP No. 100 of approximately $1.4 billion as of December 31, 2023.

The valuation methodologies used to determine the fair values of bonds, stocks and derivatives are described in the above Fair Value Measurements section of this note.

The amortized cost of cash, cash equivalents and short-term investments approximates fair value.

Fair values for mortgage loans on real estate were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

The fair value of contract loans was determined using current loan coupon rates which reflect the current rates available under the contracts. As a result, the fair value approximates the carrying value of the contract loans.

Fair values of liability for deposit-type contracts were estimated using average discounted cash flow calculations and current market interest rates.

The carrying amounts of the Separate Account liabilities approximate their fair values.

D. Financial Instruments for Which Not Practicable to Estimate Fair Values

As of December 31, 2024, the Company had no investments where it was not practicable to estimate fair value.

E. Financial Instruments Measured Using the NAV

The Company had no investments measured using the NAV.

A. Unusual or infrequent Items

The Company had no unusual or infrequent items during the reporting period.

B. Troubled Debt Restructuring: Debtors

The Company had no troubled debt restructurings during the reporting period.

C. Other Disclosures

The Company had no other disclosures during the reporting period.

D. Business Interruption Insurance Recoveries

No business interruption insurance recoveries were received.

E. State Transferable and Non-transferable Tax Credits

The Company had no unused state transferable or nontransferable tax credits.

F. Subprime Mortgage-Related Risk Exposure

1. In assessing its exposure to sub-prime risk, the Company defines sub-prime mortgage lending as the origination of residential mortgage loans to customers with weak credit profiles. Although characteristics may vary by investment, generally sub-prime mortgage loans feature high initial loan-to-value ratios or incorporate low initial payments based on a fixed introductory rate that resets to a variable index rate plus a margin for the remaining term of the loan. The Company is not an originator of below-prime mortgages, but holds direct investments in certain residential mortgage-backed securities with sub-prime exposure. The slowing U.S. housing market, greater use of affordable mortgage products, and relaxed underwriting standards for some originators of below-prime loans has led in recent years to higher delinquency and loss rates.

   To manage its risk, the Company performs a cash flow analysis on its sub-prime holdings stressing multiple variables, including prepayment speeds, default rates, and loss severity. Based on this analysis and the Company's expectation of future loan performance, other than certain credit related impairments, future payments are expected to be received in accordance with the contractual terms of the securities, and therefore unrealized losses are primarily due to changes in asset values. In addition, The Company has a security monitoring process overseen by a committee of investment and accounting professionals that identifies securities, including those with sub-prime exposure, that are subjected to an enhanced analysis on a quarterly basis.

   Specifically, in accordance with SSAP No. 43 - Revised, if management determines that the estimated discounted cash flows of an asset-backed security are less than its amortized cost, then an OTTI charge is recognized equal to the difference between the amortized cost and estimated discounted cash flows of the security. The estimated discounted cash flows of the impaired investment become its new cost basis. Estimating future cash flows is a quantitative and qualitative process that incorporates information received from third-party sources along with certain internal assumptions and judgments regarding the future performance of the underlying collateral. As a result, actual results may differ from estimates. In addition, projections of expected future cash flows may change based upon new information regarding the performance of the underlying collateral.

2. There is no direct exposure through investments in subprime mortgage loans.

3. Direct exposure through other investments as of December 31, 2024:

	Actual Cost	Carrying Value (excluding interest)	Fair Value	OTTI Losses Recognized

g. Total	$ 2,283,704	$ 2,305,473	$ 2,112,773	$ —

4. There is no underwriting exposure to subprime mortgage risk.

G. Retained Assets

1. Beneficiaries of the Company's insurance policies receiving proceeds of insurance policies can choose to receive their insurance proceeds through a settlement option called The Talcott Resolution Pathways Program ("the Program"). If selected, the full amount of the insurance proceeds paid to the beneficiary is held in the Company's General Account and earns interest at a rate determined by the Company. A draft sheet is provided to the beneficiary who has immediate access to these proceeds, including any interest, by writing drafts in a manner similar to using a personal check. The Program provides to each account holder a copy of the Terms and Conditions.

   Assets within the Program are not transferred to an "affiliated or unaffiliated bank or other financial institution." Assets are held in the Company's General Account, and drafts are payable through the Bank of New York Mellon ("BNYM"). Each business day, BNYM provides the Company with the total value of drafts that were presented for payment and the Company transfers an amount from its General Account to an account at BNYM established in the Company's name specifically for this purpose. The net deposit liability is reported as a component of Page 3, Line 3 (Liability for deposit type contracts), and amounts presented in the tables below are reported net of reinsured balances.

   Interest rates did not change during the reporting year. Between January 1, 2024, and December 31, 2024, the rate paid was 0.40%. The Company earns investment income on the assets in the Program.

   The Program did not charge any fees to their account holders during the reporting year. The Company did not use the Program as a default method for satisfying insurance claims during the reporting year.

2. The retained asset accounts held within the Program are aged as follows:

A. Ceded Reinsurance Report

Section 1 - General Interrogatories

a. There are no reinsurers listed in Schedule S as non-affiliated, owned in excess of 10% or controlled, either directly or indirectly, by the Company or by any representative, officer, trustee, or director of the Company.

b. No policies issued by the Company have been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such companies) which is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor of an insured or any other person not primarily engaged in the insurance business.

Section 2 - Ceded Reinsurance Report - Part A

1. The Company has one reinsurance agreement in effect under which the reinsurer has a limited right to unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits. See Note 1 for further discussion of prescribed practices.

    a. For the years ended December 31, 2024 and 2023, the estimated amount of the aggregate reduction in surplus of this limited right to unilaterally cancel this reinsurance agreement by the reinsurer for which cancellation results in a net obligation of the Company to the reinsurer, and for which such obligation is not presently accrued was $5,213,542 and $8,190,171, respectively.

    b. For the years ended December 31, 2024 and 2023, the total amount of reinsurance credit taken for this agreement was $6,599,420 and $10,367,305, respectively.

2. The Company has no reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts that, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies.

Section 3 - Ceded Reinsurance Report - Part B

1. The reduction in surplus due to a hypothetical termination of all reinsurance agreements would be highly dependent on the facts and circumstances of such termination. The impact of such amount as of December 31, 2024 (excluding those agreements reflected in Section 2 above) is estimated to be $282 million (before tax) prior to consideration of potential replacement reinsurance facilities.

2. There have been no new agreements executed or existing agreements amended, since January 1 of the year of this statement, to include policies or contracts which were in-force or which had existing reserves established by the Company as of the effective date of the agreement.

B. Uncollectible Reinsurance

The Company did not write off any uncollectible reinsurance during the year.

C. Commutation of Ceded Reinsurance

The Company has not commuted any material ceded reinsurance during the year.

D. Certified Reinsurer Rating Downgraded or Status Subject to Revocation

Not applicable.

E. The Company has no variable annuity reinsurance contracts with an affiliated captive reinsurer.

F. The Company has no reinsurance agreements with an affiliated captive reinsurer.

G. The Company does not utilize captives to assume reserves for ceding entities.

H. Reinsurance Credit

1. The Company has no reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) subject to A-791 that include a provision, which limits the reinsurer's assumption of significant risks identified as in A-791.

2. The Company has 6 reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) not subject to A-791, for which reinsurance accounting was applied that include a provision that limits the reinsurer's assumption of risk. Reinsurance credit was reduced for the risk limiting features in all cases.

3. The Company has no reinsurance contracts that contain features which result in delays in payment in form or in fact.

4. The Company has no reinsurance accounting credits for contracts not subject to A-791 and not yearly renewable term, which meet the risk transfer requirements of SSAP No. 61R.

5. The Company has not ceded any risk which is not subject to A-791 and not yearly renewable term reinsurance, under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement which is either: (i) accounted for as reinsurance under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP") or (ii) accounted for as reinsurance under GAAP and a deposit under SAP.

6. Not applicable.

Note 24 - Retrospectively Rated Contracts & Contracts Subject to Redetermination

A.-C. The Company has no retrospectively rated contracts.

D. The Company had no medical loss ratio rebates.

E. The Company had no accident and health insurance premiums that are subject to the Affordable Care Act risk-sharing provisions.

Note 25 - Changes in Incurred Losses and Loss Adjustment Expenses

The Company had no change to incurred losses or loss adjustment expenses.

Note 26 - Intercompany Pooling Arrangements

The Company has no intercompany pooling arrangements.

Note 27 - Structured Settlements

The Company has not purchased any structured settlements.

Note 28 - Health Care Receivables

The Company has no health care receivables.

Note 29 - Participating Policies

Net premiums under individual life participating policies were $3,630,019 and $4,432,321 for the years ended December 31, 2024 and 2023, respectively. Policyholder dividends are accrued using an estimate of the amount to be paid based on underlying contractual obligations under policies and applicable state laws. In 2024 and 2023, the Company paid policyholder dividends in the amount of $3,706,798 and $2,654,998, respectively, and did not allocate any additional income to such policyholders.

Note 30 - Premium Deficiency Reserves

The Company had no premium deficiency reserves.

Note 31 - Reserves for Life Contracts and Deposit-Type Contracts

1. For non-interest sensitive ordinary life plans, the Company waives deduction of deferred fractional premiums upon death of insured. Return of the unearned portion of the final premium is governed by the terms of the contract. The Company has no forms for which the cash values are in excess of the legally computed reserve.

2. Extra premiums are charged for substandard lives, in addition to the regular gross premiums for the true age. Mean reserves for traditional insurance products are determined by computing the regular mean reserve for the plan at the true age, and adding one-half (1/2) of the extra premium charge for the year. For plans with explicit mortality charges, mean reserves are based on appropriate multiples of standard rates of mortality.

3. As of December 31, 2024, the Company had $15,745,469 of insurance in force for which the gross premiums are less than the net premiums according to the standard valuation set by the State of Connecticut. Reserves to cover the above insurance totaled $106,897 at year end and are reported on Exhibit 5, Miscellaneous Reserves.

4. For certain interest sensitive products, basic data is used to determine Tabular Interest and Tabular Cost for Page 7, Part A. For other products, Tabular Interest, Tabular less Actual Reserve Released, and Tabular Cost (Page 7) have been determined by formula as described in the instructions for Page 7.

5. Tabular Interest is determined as the balancing item.

6. Other increases (Page 7, Line 7) include changes in the difference between account values and surrender values, and reserves transferred under reinsurance agreements.
